

FIDONET on AMBROSIA60

Fidonet Projects @ Sourceforge.Net

MAKENL_NG	MakeNL New Generation, MakeNL nodelist compiler	sourceforge.net/projects/makenl/
HUSKY	Husky Suite, Tosser, Ticker, Areafix, FTN library	sourceforge.net/projects/husky/
MYSTICBBS	Mystic Telnet BBS	sourceforge.net/projects/mysticbbs/
FIDOIP	FIDONet nodes and points automatic installation package	sourceforge.net/projects/fidoip/
FTN Applications	Provides a repository for FTN Applications, especially orphaned ones. MFreq, VIREQ/X, CrashMail II, JamNNTPd, TinyTIC	sourceforge.net/projects/ftnapps/
Perl for FTN Systems	repository of Perl scripts for use on Fidonet Technology Networks (FTN) systems FTN::Packet FTNDB FTN::Database FTN::JAM FTN::Log FTN::Nodelist	sourceforge.net/projects/ /
GOLDED-PLUS	GoldED Fidonet Mail Reader/Editor auch: GOLDED+	sourceforge.net/projects/golded-plus/

HELLED	HellEd, full-featured GUI FTN message editor	sourceforge.net/projects/helled/
ARGUS	ARGUS FTN mailer	sourceforge.net/projects/argus/
OpenXP	OpenXP is a multi-protocol offline mail and news reader for the text console, supporting Internet email, Usenet, Fidonet, Zconnect, etc. It is based on CrossPoint (XP) by Peter Mandrella.	sourceforge.net/projects/openxp/
WWIV	WWIV BBS	sourceforge.net/projects/wwiv/
MAXIMUS	Maximus BBS	sourceforge.net/projects/maximus/
PCBOARD BBS	PCBOARD BBS	sourceforge.net/projects/pcboard/
FIDOGATE	FIDOGATE is a Fido-Internet gateway, a Fido FTN-FTN NetMail gateway, a Fido tosser, a Fido file processor/ticker, and a Fido Areafix/Filefix program (inactive)	sourceforge.net/projects/fidogate/
FIDOGATE-DS	FIDOGATE is a Fido-Internet gateway, a Fido FTN-FTN NetMail gateway, a Fido tosser, a Fido file processor/ticker, and a Fido Areafix/Filefix program	sourceforge.net/projects/rusfidogate/
Ifmail	Ifmail - Fidonet transport and gateway for UNIX platform	sourceforge.net/projects/ifmail/
qico	qico FTN mailer. Small, robust mailer (MTA) for FIDO and FIDO-like amateur networks.	sourceforge.net/projects/qico/
RNtrack	RNtrack (aka FTrack-AS) is a mail tracker/router for FidoNet-like networks. It has support for a popular message bases: MSG, PKT, Squish and JAM. Perl-scripting support does its work very flexible.	sourceforge.net/projects/ftrack-as/
PointMaster	Tool for managing pointlists in FTN-based networks (with pointlist editor)	sourceforge.net/projects/pointmaster.berlios/

Xenia	Xenia - FidoNet technology mailer, editor and utilities	sourceforge.net/projects/xenia-fidonet/
MultiMail Offline Reader	MultiMail is an offline mail packet reader for Unix and other systems.	sourceforge.net/projects/multimail/
rss2fido	RSS to FidoNet (rss2fido) by_Rain 27/09-2006g. The program is designed to track new items RSS and forming specially messages to FidoNet.	sourceforge.net/projects/rss2fido/
kubik	FidoIP related software for fidonet (all in Russian language)	sourceforge.net/projects/kubik/
JEdPoint	Modular Java Fidonet mail reader, writer, tosser, etc.	sourceforge.net/projects/jedpoint/
Radius FTN mailer	This project has been merged into Argus SF project	sourceforge.net/projects/radiusmailer/
QFE - Qt FTN Message Editor	QFE is full-featured cross-platform FTN message editor with a graphical interface.	sourceforge.net/projects/qfe/
OpenXP 5	OpenXP 5 - a multi-protocol offline mail and news reader OpenXP 5 is a multi-protocol offline mail and news reader for the text console, supporting internet email, Usenet, Fidonet, Zconnect, etc. It is based on OpenXP (https://sourceforge.net/p/openxp , currently inactive) which is based on CrossPoint (XP) by Peter Mandrella. OpenXP 5 is capable of establishing SSL / TLS encrypted connections to POP3, SMTP and IMAP based servers.	sourceforge.net/projects/openxp5/
Filin PLUS	Fully-functional small and fast FTN (FIDOnet-Like) FileEchoProcessor	sourceforge.net/projects/filin/
exAR+ is FTN-mailer for OS Windows	This project is expiremental branch of Argus FTN Mailer, originally dev...	sourceforge.net/projects/exar-plus/
FMail	The Fast Echomail Processor/tosser, for Fidonet Technology Networks	sourceforge.net/projects/fmail/
Meltdown BBS	Meltdown BBS is a free, web-based Bulletin Board System written in PHP with a MySQL backend.	sourceforge.net/projects/meltdown-bbs/

Walther-Fido package for BeOS	A set of programs for working in FidoNet under BeOS.	sourceforge.net/projects/walther/
BinkleyTerm XE	BinkleyTerm is a freely available FidoNet compatible electronic mail interface and dumb terminal package.	sourceforge.net/projects/btxe/
Bonzo	Bonzo is a Fidonet mail reader for 32bit Windows that is in need of a new developer.	sourceforge.net/projects/bonzo/
ErrFlags	Fidonet nodelist checker Latest version is: ErrFI215.rar v2.15 dated 2012-12-30 (OLD Version) but there are still some more fresh versions announced: v2.18, and in Errflags.zc2 info v2.20 and v2.21 see also revision v2.21 @_github	sourceforge.net/projects/errflags/
FTNDB	Fidonet/FTN SQL Database processing application	sourceforge.net/projects/ftndb.ftnpl.p/
FidoAccess library / SquishIndexer	FidoAccess is a .NET assemble that provides classes to access FIDO-based messagebases like Squish, JAM, MSG for read	sourceforge.net/projects/fidoaccess/
Fidonet Mail Access/Express for Delphi	Fidonet Mail Access/Express for Delphi	sourceforge.net/projects/fmax/
Filemgr	Filemgr a BBS file & .tic tosser	sourceforge.net/projects/filemgr/
GAC Suite of BBS Doors	Gac_Software. - All the GAC doors for bbs use.	sourceforge.net/projects/gacdoor/
Husky II	Husky: Generation II	sourceforge.net/projects/husky2/
Itraxp	Itraxp - is a FTN messages tracker, using Perl library of FTN functions based on the concept found in a popular Itrax program. Itraxp supported Jam, Squish, Msg, Pkt FTN bases.	sourceforge.net/projects/itraxpl/

JAM Message Base Library	JAM is a popular messagebase format for storing Fidonet messages originally devised by Joaquim Homrighausen, Andrew Milner, Mats Birch and Mats Wallin. JAMLIB is a subroutine library for manipulating such messagebases.	sourceforge.net/projects/jamlib/
JustTosser	JustTosser	sourceforge.net/projects/justtosser/
KitStat2	KittenMail Statistic Generator	sourceforge.net/projects/kitstat2/
MyPoint: A complete FidoNet point system	MyPoint: A complete FidoNet point system (reader/editor/tosser/mailer) for DOS and Windows.	sourceforge.net/projects/mypoint/
NLMake Project	A project to fix the bugs in the NLMake nodelist compiler.	sourceforge.net/projects/nlmake/
Nexus Bulletin Board System	Nexus Bulletin Board System is a comprehensive, multi-user, multi-node BBS package.	sourceforge.net/projects/nexusbbs/
Old AUXChat	AUXChat has died, the source was lost, and the project was not finished.	sourceforge.net/projects/auxchat/
Parma Tosser (ParToss)	Parma Tosser is FTN echotossers for DOS, OS/2, Win32, Linux platforms.	sourceforge.net/projects/partoss-csv/
RadiusFTN	Radius FTN Mailer (mostly for FidoNet). Win32 Application. Delphi7. GUI.	sourceforge.net/projects/radiusftn/
Rtfm! FIDO mail editor	Simple GUI FIDO message editor, client/server.	sourceforge.net/projects/rtfme/
SBBS - Serenity - File Bulletin Generator	Serenity is meant to replace Allfix (And Allfix like programs) and TinyTic to handle files that are received to your SBBS system and to hatch them out as well. It will also create an Allfile list as well.	sourceforge.net/projects/sbbs-serenity/
SQLToss Project	The SQLToss Project is for the creation of tools and methods to toss FidoNet	sourceforge.net/projects

	echoes into/out of a MySQL Database.	/sqltoss/
SocialNet	It's an SocialNetwork,designed to be friendly and easy to use.	sourceforge.net/projects/socialnet/
Taurus FTN mailer	FIDOnet technology GUI mailer	sourceforge.net/projects/taurusftn/
TheFix!	TheFix! is FIDOnet areafix, filefix, DNS domain builder, downlink manager, Netmail routing generator	sourceforge.net/projects/thefix2/
TinyTIC	TinyTIC	sourceforge.net/projects/tinytic.ftnapps.p/
Turquoise SuperStat	Turquoise SuperStat reads the contents of a Fidonet message area in one of its supported formats, or standard Usenet news spools, and creates statistics. Turquoise SuperStat supports Squish, *.MSG, FDAPX/w, JAM, MyPoint and tanstaaf's message area base format, and Usenet news groups, either via standard Usenet news spools, or over NNTP.	sourceforge.net/projects/turqstat/
WaterGate	Message processor for FidoNet & Internet/Usenet	sourceforge.net/projects/watergate/
andrbiz fido gate	Database application allowing to gate messages from/to FIDONET.	sourceforge.net/projects/andrbiz/
bink4j	Java port of BinkD TCP/IP fidonet mailer.	sourceforge.net/projects/bink4j/
echoedit	Echoedit is a full-featured FTN message editor with a graphical interface.	sourceforge.net/projects/echoedit/
intersquish	Fido internet mail, news gate	sourceforge.net/projects/intersquish/
newed	NewEd - FTN compatimle mail editor with gui and SQL based messagebase.	sourceforge.net/projects/newed/

phpFidoNode	phpFidoNode is a project intended to implement the basic Fidonet software functionality by using PHP language. Now, the main part of the project is phfito - PHP Fidonet Tosser written by Alex Kocharin.	sourceforge.net/projects/phpfidonode/
pyfidonet	An attempt at an implementation of the fidonet web app using django 1.3	sourceforge.net/projects/pyfidonet/
sourceforge.net FIDO projects	Further FTN / Fido software projects at sourceforge.net	sourceforge.net FIDO projects
